Professional Experience & Achievements

2016 - 2022 Environmental Institute of Mato Grosso do Sul - Imasul

As a Process Manager, I have led a team of 2, always prioritizing efficient communication. I was also able to develop an application for process management using VBA, which reduced the time of data input in 30%.

In order to improve the process even further, I also started developing a web application using the following stack: Python, Flask, MS SQL Server and MySQL.

2014 - 2015 Alto Uruguai Environmental Solutions

The main role, working as an Environmental Analyst, was to generate thematic maps utilizing AutoCAD, ArcGIS and Quantum GIS. These maps were used to elaborate Solid Waste Management Plans for municipalities.

We were able to double the speed of it when my colleague and I started using Python to create simple scripts that could partially automatize the process.

Training

Udemy - Introduction to Computer Programing

Udemy - Introduction to the Python Language

Udemy - Python for beginners

Udemy - Python Flask for beginners

2019-2021 Udemy - Data Science: Data visualization with Python

Udemy - Introduction to HTML

Udemy - Flask - Full Stack - A Truly Engaging "zero to know"

Udemy - Microsoft SQL Server - An Introduction

Udemy - A beginners guide to Django

Academic Qualifications

2017-2019 Post-graduate - Project Management

Completed at: Dom Bosco Catholic University.

2010- 2015 Bachelor - Environmental Engineering

Completed at: Federal University of Mato Grosso do Sul.
